

Title:
Sensors

Short Description:
Engineered for precision and reliability, our sensors enable smarter, more efficient systems in an increasingly electrified world - it's why we're #1 in magnetic sensor IC market.

Content:

Current Sensors
Allegro's current sensors deliver galvanic isolation, lossless operation, and high-precision accuracy-enabling maximum efficiency and power density in compact systems.

Inductive Position Sensors
Allegro's inductive sensors deliver precision motor position sensing with unmatched configurability, enabling tailored performance for diverse applications.

Position Sensors
Allegro's position sensors deliver accurate, contactless linear and rotary measurements across harsh automotive and industrial environments.

Speed Sensors
Backed by decades of algorithm expertise, our speed sensor solutions ensure reliable operation, even in harsh environments with vibration, EMI, and air gap variations.

Switches and Latches
Allegro offers a comprehensive range of magnetic switches and latches featuring both Hall-effect and TMR technologies for ultra-low power consumption and high reliability.
